**EAST OF HUDSON WATERSHED CORPORATION
ADDENDUM #1**

**STORMWATER RETROFIT PROJECT
Pat-EB-603**

The East of Hudson Watershed Corporation (EOHWC) must receive a signed copy of this addendum with the Bid to be considered responsible and complete.

This addendum is issued in response to questions raised at the Mandatory Pre-Bid Conference at the project site on December 4, 2019 and submitted by email thereafter:

1. The substantial project completion will be required by May 1, 2020
2. This is not a tax exempt project and all appropriate taxes should be included within the contractor's bid. The project is prevailing wage.
3. There are no existing grades on the plan. Is the site balanced so that fill will not need to be brought in to repair the washout on the lower section?
 - a) *The existing grades are shown on the Conceptual Site Plan Sheet 1 of 3. No grading will be done outside of the construction limits. The slopes on the sides of the channel shall be graded as needed to install the V-Max and Rip-rap (see detail Channel Section on "Channel Restoration Plan & Details" sheet 3 of 3). No fill is required, the project will only entail stabilizing the channel.*
4. Does any fill need to be exported?
 - a) *All excavated material shall be removed from site.*
5. There is no spacing for the check dams. The drawing states that spacing varies depending on the slope. How should this be addressed?
 - a) *Check dams are required for every vertical drop of 2 feet per the detail on Sheet 3 of 3. Base number of check dams off of the "Conceptual Site Plan sheet 1 of 3, where 1 ft. contours are shown*
6. Is the whole channel lined with rip-rap?
 - a) *Yes, the entire channel is lined with rip rap*
