## 1. INTRODUCTION

This Annual Report has been prepared to provide a summary of the completed, current, and upcoming activities; and financial status; of the East of Hudson Watershed Corporation (EOHWC). This Annual Report also includes limited information about the stormwater retrofit projects (SRPs) completed by the members prior to the formation of EOHWC. It is submitted in fulfillment of the requirements of Part IX.A.5.b of the May 1, 2010, SPDES General Permit for Stormwater Discharges from MS4's (MS4 Permit).

The EOHWC was formed on October 19, 2011 under Section 1411 of the New York State Not-For-Profit Corporation Law. The EOHWC is operated for charitable purposes, has received federal tax exemption as a 501(c)(3), and was established to administer, coordinate, and implement the East of Hudson (EOH) regional stormwater retrofit plans. The regional stormwater retrofit plans were developed as a response to the heightened phosphorus removal requirements of the New York State Department of Environmental Conservation (NYSDEC) General Permit GP-0-08-002 Municipal Separate Storm Sewer Systems Permit (MS4 General Permit).

The MS4 General Permit became effective on May 1, 2008; and was replaced by GP-0-10-002 which became effective on May 1, 2010 and expired on April 30, 2015. The GP-0-15-003 permit was issued in April 2015 and became effective on May 1, 2015. GP-0-15-003 is a two (2) year interim permit intended to cover discharges of stormwater to surface waters of the State from small MS4s.

As issued, GP-0-15-003 contains only conforming changes, such as a new general permit identification number, a two (2) year term, and updated references to the SPDES General Permit for Stormwater Discharges from Construction Activity (GP-0-15-002) and Multi-Sector General Permit for Stormwater Discharges Associated with Industrial Activity (GP-0-12-001).

The regional stormwater retrofit plans are a five year plan, beginning in 2010 and ending in 2014, with projects identified for each year. The NYSDEC and NYCDEP have granted EOHWC authority to continue design and construction projects into the 2015 calendar year to complete the program pollutant removal goals. Throughout this Annual Report, reference is made to Year 1 (2010), Year 2 (2011), Year 3 (2012), Year 4 (2013), and Year 5 (2014-2015).

The EOHWC is a Regional Stormwater Entity (RSE) with 19 members (18 municipalities and one County), operating in 18 municipalities and three Counties in the EOH watershed. The EOHWC is governed by a Board of Directors, composed of the chief elected official of each member. The chief elected official may delegate authority to another municipal employee. Each member has passed resolutions to join the EOHWC and authorize implementation of the regional stormwater retrofit plans by the EOHWC on behalf of each member.

## **2. ORGANIZATION**

Daily operations of the EOHWC are completed by the supporting staff.

The staff employees for the calendar year 2014 were:

1. Executive Director: Rahul Verma, P.E. LEED AP (End Date: August 8, 2014)
2. Project Manager: Kevin Fitzpatrick, P.E. (Start Date: March 4, 2013)
3. Controller: Joanne Tavino (Start date: August 12, 2014)
4. Office Manager: Sharon Dirac (End date: March 9, 2015)
5. Records Management Coordinator: Linda Matera (Start Date: September 29, 2014)
6. Accounts Payable Coordinator: Yvette Rivera (Start Date: September 29, 2014)
7. Staff Attorney: Danielle Harris, Esq. (End Date November 14, 2014)

Current Project Engineer, John Belyea, P.E., M.S. EnvE., joined the staff on April 13, 2015.

The current Board Members are:

1. Town of Bedford: Chris Burdick
2. Village of Brewster: James Schoenig
3. Town of Carmel: Kenneth Schmitt
4. Town of Cortlandt: Linda Puglisi
5. Town of Kent: Maureen Fleming
6. Town of Lewisboro: Peter Parsons (Vice President)
7. Village of Mount Kisco: J. Michael Cindrich
8. Town of New Castle: Robert Greenstein
9. Town of North Castle: Michael Schiliro
10. Town of North Salem: Warren Lucas (Treasurer)
11. Town of Patterson: Michael Griffin (President)
12. Town of Pawling: David Kelly (Secretary)
13. Village of Pawling: Robert Liffland
14. Putnam County- Mary Ellen O'Dell
15. Town of Putnam Valley- Robert Tendy
16. Town of Pound Ridge: Richard Lyman
17. Town of Somers: Rick Morrissey
18. Town of Southeast- Tony Hay
19. Town of Yorktown: Michael Grace

### **3. PURPOSE**

The EOHWC was established as a regional stormwater entity under Part IV.B of the MS4 Permit to administer, coordinate and implement the East of Hudson regional stormwater retrofit projects (SRPs) with funding made available by the NYCDEP, Westchester County, and Putnam County. Through the EOHWC, the member municipalities are collectively achieving compliance with their SRP requirements (a.k.a. “bubble compliance”), regardless of the physical location of each retrofit.

**Plunge Pools- NS-MU-08/09**

(CKWIC), the Putnam County MS4 Coordinating Committee (PCMS4CC) Stormwater Technical Advisory Committee (STAC), and the Dutchess County MS4 Coordination Committee.

The Year 5 SRPs for each member municipality were identified by stormwater technical committees in Dutchess, Putnam, and Westchester counties and by Town personnel (e.g. town engineer, highway superintendent). The stormwater technical committees

include: the Croton-Kensico Watershed Intermunicipal Coalition

**Porous Asphalt Installation: S-MU-09A**

Construction of all Year 5 SRPs is expected to be completed in 2015.

The Year 5 work plan was submitted to and approved by the New York State Department of Environmental Conservation (NYSDEC). The SRPs are phosphorus reducing stormwater retrofit projects designed to attain the five-year phosphorus removal requirement established by the NYSDEC. Construction contracts for those projects currently in

The individual municipalities began stormwater retrofit projects in Year 1, and continued as individual municipalities in Year 2. EOHWC began to manage, administer, and fund stormwater retrofit projects in Year 3; and will continue this role through Year 5.

#### **4. STORMWATER RETROFIT PLAN SUMMARY**

In a letter dated January 29, 2015 the NYSDEC has confirmed and approved the completion of projects totaling 251.4 kg/yr of phosphorus removal. EOHWC has submitted documentation for the final approval of projects totaling an additional 70 kg/yr on May 8, 2015 and expects the approval of these projects in the near future. Table

**Cell 1 Construction: SE-POT-1**

1 provides an overall summary of the EOHWC Stormwater Retrofit Program. The Actual Phosphorus Reduction for Years 1 and 2 is based on documentation provided by the individual municipalities to EOHWC, and submitted to the NYSDEC by EOHWC, for SRPs completed by each member municipality prior to the formation of the EOHWC. The Year 1 and 2 submittal has been updated as Year 2 projects are completed by the member municipality and/or EOHWC. The Year 2 Phosphorus Reduction value is calculated from Year 2 SRPs that had been started by a member municipality, and were either completed by the member municipality or transferred to EOHWC to complete design and construction. For the Year 2 SRPs completed by the member municipalities, certification documents have been obtained from the member municipality and submitted to the NYSDEC. All projects which EOHWC has received credit for or is pursuing credit for from Years 1 and 2 are reflected on Table 3. All projects from Year 3 and Year 4 which EOHWC has received credit for or is pursuing credit for from the NYSDEC is listed on Table 4.

The projects included on the NYSDEC approved Year 5 Work Plan can be found in Table 5. Execution of the design contracts on all projects (excluding L-CR-30) did not occur until 2015.

Table 1: Stormwater Retrofit Program Summary

MS4	Five Year Phosphorus Reduction Requirement (kg/yr)	Actual Phosphorus Reduction (kg/yr)				Estimated Phosphorus Reduction (kg/yr)				Estimated Totals (kg/yr) (1)	
		Year 1	Year 2	Year 3	Year 4	Year 2 (1)	Year 3 (1)	Year 4 (1)	Year 5 (1)	Total Reduction	Remaining Reduction Requirement

<b>Total</b>	<b>459.5</b>	<b>51.7</b>	<b>32.4</b>	<b>165.0</b>	<b>13.5</b>	<b>36.6</b>	<b>36.3</b>	<b>95.8</b>	<b>65.6</b>	<b>496.8</b>	<b>0.0</b>

(1) Based on conceptual estimates. May be revised up or down.

Table Notes:

- (1) The above table reflects an accepted phosphorus reduction of 262.5 kg/yr. Additional Year 1 and Year 2 projects which were previously approved as part of this program were identified since the last submission to NYSDEC. These values were reflected in the EOHWC submittal to NYSDEC on May 8, 2015.
- (2) Sources: "Stormwater Retrofit Program" by Putnam County MS4 Coordinating Committee, dated December 31, 2009; and "Regional Stormwater Implementation Plan", by CKWIC, August 2010.

- (3) Sources: “Summary of Completed Retrofit Projects: Project Years 1 & 2” and “Summary of Completed Retrofit Projects: Project Years 3 & 4” by EOHWC and dated 10/31/2014; email from Robert Capowski on 12/9 and 12/11/2014.
- (4) Estimated values are from information provided by engineering consultants providing professional services under EOHWC contracts; from some municipalities with NYSDEC grants for stormwater retrofit projects; and conceptual design from EOHWC. The actual phosphorus removal will be determined based on the submission of Record Documents stamped by a Professional Engineer to the NYSDEC.
- (5) Total Reduction value shown is expected to decrease as SRP evaluation and design progresses.

Table 2:

## Summary of Completed Retrofit Projects: Project Years 1 &amp; 2

Municipality	PJT YR	Project ID	Common Name	Retrofit	Phosphorus Removal (kg/yr)	Drainage Area (acres)	NYSDEC Acceptance Received Date

**Subsurface Gravel Wetland: SE-POT-01**

The following nomenclature is used in this Annual Report to describe project status:

1. **Cancelled:** SRP was cancelled by EOHWC prior to or during design. Typical reasons for cancelling a SRP include: low phosphorus removal, located on private property, site constraints preventing proper design, permitting complexity, and/or cost.
2. **Postponed:** The SRP was submitted to and evaluated by EOHWC. Based on the current program parameters and progress, these projects will be evaluated for inclusion as part of Years 6-10.
3. **Complete:** SRP has been constructed however the project has not been completely removed from our tracking system. This occurs when a project still requires stabilizing or outstanding payments remain.
4. **Closed:** The SRP is no longer being tracked by EOHWC for project closeout.

Table 4 lists the Year 3 stormwater retrofit projects and the current status. Additional data describing the Year 3 stormwater retrofit projects is provided in Appendix A and Appendix C.

Not all of the projects presented in Table 6 will proceed to design and construction as presented, thus the actual Year 5 project list and total phosphorus removal will vary from those presented in Table 6.

## 5. FUNDING SOURCES AND FINANCIAL SUMMARY

The EOHWC funding has been and will be provided directly or indirectly by the New York City Department of Environmental Protection (NYCDEP). The legal structure of the EOHWC allows transfer of funds from the NYCDEP, Westchester County, and Putnam County to the EOHWC for implementing the SRPs. There are four primary funding sources for the design, permitting, and construction of SRPs:

1. NYCDEP from 2010 Water Supply Permit (WSP): \$15.5 million
2. NYCDEP from 2007 Filtration Avoidance Determination (FAD): \$4.5 million
3. Westchester County from 1997 Memorandum of Agreement (MOA): \$10 million
4. Putnam County from 1997 Memorandum of Agreement (MOA): \$8.2 million

The Westchester County MOA funds were transferred to the EOHWC on June 20, 2012. An initial transfer of \$250,000 of the Putnam County MOA funds to the EOHWC was completed in April 2012. A partial transfer (\$7,447,815.35) of the Putnam County MOA funds to the EOHWC was completed on June 15, 2012. The final transfer (\$75,981.11) of the Putnam County MOA funds was transferred to the EOHWC on October 22, 2012. The remainders of the Putnam County MOA funds were used by Putnam County to provide funding for Year 2 stormwater retrofit projects. The transfers were authorized by Intermunicipal Agreements between the County and the municipalities located in each County.

The NYCDEP Funding Agreement was registered on July 18, 2013. From the Funding Agreement, an initial disbursement of \$10,000,000 was transferred to EOHWC on September 23, 2013 from the Water Supply Permit (WSP) allocation. The FAD funding in the amount of \$4,500,000 was transferred to the EOHWC on March 21, 2014. The remaining WSP (\$5,500,000) funds have not been transferred to the EOHWC, and will be invoiced in accordance with the requirements of the Funding Agreement.

The WSP and FAD funds are principal funds, bonded by the NYCDEP for capital expenditures. Thus, projects completed using these funds must, at minimum, have a 5-year life span, minimum total project cost of \$35,000, and have begun after January 1, 2011. The MOA funds are interest on funds previously provided by NYCDEP to Putnam and Westchester counties, and are only restricted to stormwater retrofit projects in the original County.

In addition, each municipality may seek grants from other sources (e.g. NYSDEC Water Quality Investment Program, Environmental Facilities Corporation, etc.). Grants for stormwater retrofits were awarded to the Town of Bedford, Town of Kent, Town of North Salem, Town of Somers, and Village of Pawling. NYSDEC grants include a match requirement by the recipient. EOHWC will reimburse the municipalities for the match component, if requested.

The following tables provide various data describing the EOHWC financial status. The Total Expenditures, based on the four primary expense categories, are shown in Tables 7A and 7B. The expense categories can be generally described as follows:

1. **General Administration:** Expenses internal to EOHWC operations, including non-project expenses (salaries, benefits, travel, office equipment/supplies, computer hardware and software, advertising, utilities, insurance, rent, etc.).
2. **Project Administration:** Expenses internal to EOHWC operations for project expenses (e.g. reviewing design submittals, project designs, coordinating with consultants and/or contractors, project meetings, etc.).
3. **Design:** Fees paid by EOHWC to engineering consultants, in accordance with Professional Service Contracts, Task Orders, and/or Change Orders. This may also include reimbursement to municipalities for design fees paid by the municipality, and/or reimbursement to municipalities for the match component of a grant for the design of an acceptable SRP.
4. **Construction:** Fees paid by EOHWC to construction contractors, in accordance with an executed Agreement included within the Contract/ Bid Documents, and/or Change Orders. This may also include reimbursement to municipalities for construction costs paid by the municipality.

Table 7A: Total Expenditures (2014)

Expense Type	Amount
General Administration	\$ 488,909 ( 5.9%)
Project Administration	\$ 170,459 ( 2.1%)
Design	\$ 1,355,681 (16.3%)
Construction	\$ 6,299,001 (75.7%)
TOTAL	\$ 8,314,050

Table 7B: Total Expenditures (2012 thru 2014)

Expense Type	Amount
General Administration	\$ 1,118,190 ( 5.3%)
Project Administration	\$ 469,410 ( 2.3%)
Design	\$ 3,687,850 (17.3%)
Construction	\$ 15,949,061 (75.1%)
TOTAL	\$ 21,224,511

Table 8 includes a summary of the various source funds available to EOHWC for stormwater retrofit projects, and lists the total expenses against each source fund. Putnam County funds in the amount of \$4.7 million were used to fund WSP projects above the initial \$10 million received and will be replenished upon receipt of the additional \$5.5 million WSP funding.

Table 8: Fund Summary (2012-2014)

Source Fund	Initial Funds Received	Earnings/(Expenses)	Remaining
Putnam County MOA	\$ 7,773,796	(\$ 5,515,001)	\$ 2,258,795
Westchester County MOA	\$ 10,000,000	(\$ 1,132,808)	\$ 8,867,192
DEP Funding Agreement (WSP)	\$ 10,000,000	(\$ 10,000,000)	\$ 0
DEP Funding Agreement (FAD)	\$ 4,500,000	(\$ 4,500,000)	\$ 0
Bedford (Non-SRP)	\$ 70,000	(\$ 70,000)	\$ 0
Interest Earnings	\$ 72,042	(\$ 6,701)	\$ 65,341
Adjust for prepaid and Accruals			\$ 109,186
Totals	\$ 32,415,838	(\$ 21,224,511)	\$11,300,514

The target SRP efficiency, based on available funding of \$38.2 million and a phosphorus removal requirement of 459.5 kg, is approximately \$83,000/kg. Based on the project and financial data to date, the approximate average SRP efficiency for SRPs in progress, completed, and/or cancelled as part of the EOHWC program, is

\$70,000/kg. Not counting projects which were completed prior to the formation of the EOHWC, the current projected efficiency of the EOHWC program is \$85,000/kg.

As the Funding Agreement source funds were not available to EOHWC until September 2013, project and administration costs were charged against the Putnam and/or Westchester MOA source funds. Upon receipt of the initial disbursement from the Funding Agreement, funds previously spent from the Putnam and/or Westchester MOA source funds on eligible expenses were reclassified from the Funding Agreement to the Putnam and/or Westchester MOA source funds.

## **6. FUTURE WORK**

### **6.1 Completion of the 5-Year Stormwater Retrofit Program**

The EOHWC is advancing towards the completion of the 5-Year Stormwater Retrofit Program on December 31, 2015. All projects which are scheduled to count towards the required 459.5 kg/yr removal total will be completed through construction this calendar year.

### **6.2 Operation and Maintenance Policy**

To comply with the MS4 General Permit, the member municipalities must complete routine O&M on the SRPs. The EOHWC is developing an O&M policy to describe: the O&M requirement; who will be responsible for O&M; and how O&M will be funded if EOHWC has funds for O&M, and if EOHWC does not have funds for O&M.

### **6.3 Program Requirements and Funding for Years 6-10**

The East of Hudson Watershed Coalition will begin negotiation of the Years 6-10 stormwater retrofit program requirements and funding requirements. This task cannot be supported or executed by EOHWC under the current requirements of the Funding Agreement and IMA's.

#### **6.4 Additional MS4 responsibilities for EOHWC**

The Board of Directors has discussed assigning additional responsibilities to EOHWC for compliance with the MS4 General Permit. Some of these responsibilities may include education and mapping. Additional funding sources will have to be identified and secured, as the current funding sources are limited to phosphorus-reducing stormwater retrofit projects. This will require an increase in staffing levels, dependent on the additional responsibilities assigned to EOHWC and funding.

## EAST OF HUDSON WATERSHED CORPORATION

This Year 5 Stormwater Retrofit Progress Report (Y5 SRPR) has been prepared by the East of Hudson Watershed Corporation (EOHWC) to document the progress of the stormwater retrofit program in the East of Hudson New York City Watershed through 2014 (Year 5). It is submitted in fulfillment of the requirements of Part IX.A.5.b of the May 1, 2010, SPDES General Permit for Stormwater Discharges from MS4's (MS4 Permit)

The EOHWC was established as a regional stormwater entity under Part IV.B of the MS4 Permit to administer, coordinate and implement the East of Hudson regional stormwater retrofit projects (SRPs) with funding made available by the NYCDEP, Westchester County, and Putnam County. Through the EOHWC, the member municipalities are collectively achieving compliance with their SRP requirements, regardless of the physical location of each retrofit.

The Year 5 SRPs for each member municipality were identified by stormwater technical committees in Dutchess, Putnam, and Westchester counties and by Town personnel (e.g. town engineer, highway superintendent). The stormwater technical committees include: the Croton-Kensico Watershed Intermunicipal Coalition (CKWIC), the Putnam County MS4 Coordinating Committee (PCMS4CC) Stormwater Technical Advisory Committee (STAC), and the Dutchess County MS4 Coordination Committee.

The Year 5 work plan was submitted to and approved by the New York State Department of Environmental Conservation (NYSDEC). The SRPs are phosphorus reducing stormwater retrofit projects designed to attain the five-year phosphorus removal requirement established by the NYSDEC. Construction contracts for those projects currently in design will be executed in either 2015 or 2016, depending on several factors including design progress, municipal review and acceptance, and easement negotiations. Construction of all Year 5 SRPs is expected to be completed in 2015/2016.

## EAST OF HUDSON WATERSHED CORPORATION

Based on the information collected by EOHWC, the current status of the SRP program is summarized in Table 1. The individual municipalities began stormwater retrofit projects in Year 1 and continued through Year 2. In Year 3, EOHWC began to manage, administer, and fund stormwater retrofit projects and has continued serving in this function for Years 4 and 5. To date, the EOHWC has been credited with 251.4 kg/yr of phosphorus removal by the NYSDEC. EOHWC has completed projects totaling 261.8 kg/yr of phosphorus removal at the time of this report and will be submitting additional project credit in early 2015 at the completion of all open construction contracts.

EOHWC is currently on track to exceed their 5-Year phosphorus removal requirement should all estimated project totals receive final removal credit by the NYSDEC.

# EAST OF HUDSON WATERSHED CORPORATION

Table 1: Stormwater Retrofit Program Summary

MS4	Five Year Phosphorus Reduction Requirement(1) (kg/yr)	Actual Phosphorus Reduction (kg/yr)				Estimated Phosphorus Reduction (kg/yr)				Estimated Totals (kg/yr)	
		Year 1 (2)	Year 2 (2)	Year 3 (2)	Year 4 (2)	Year 2 (3)	Year 3 (3)	Year 4 (3)	Year 5 (3)	Total Reduction (4)	Remaining Reduction Requirement
Bedford	32.2	9.1	7.3	5.4	3.7	-	-	-	24.7	50.2	0.0
Brewster	9.2	-	-	83.6	-	-	-	-	-	83.6	0.0

(2) Sources: “Summary of Completed Retrofit Projects: Project Years 1 & 2” and “Summary of Completed Retrofit Projects: Project Years 3 & 4” by EOHWC and dated 10/31/2014; email from Robert Capowski on December 9 and December 11, 2014

(3) Estimated from information provided by engineering consultants providing professional services under contract from Solicitations 2012-01, 2012-02, 2013-03, 2013-04, 2013-05, 2013-06, 2013-07, 2013-09, 2013-10, 2013-11, 2013-12; from some municipalities with NYSDEC grants for stormwater retrofit projects; and conceptual design from EOHWC. The actual phosphorus removal will be

## EAST OF HUDSON WATERSHED CORPORATION

determined based on the submission of Record Documents stamped by a Professional Engineer to the NYSDEC.

(4) Value shown is expected to decrease as SRP evaluation and design progresses.

## EAST OF HUDSON WATERSHED CORPORATION

### EOHWC Project Summaries

**B-CR-29 (Mount Holly Road – Year 1)** – Located in the Town of Bedford, this retrofit project included a channel stabilization along Mount Holly Road. This project was completed by the municipality and funded by Westchester County. This project has been approved by the NYSDEC.

**B-MU-07 (Bedford Hills Memorial Park – Year 3)** – Located in the Town of Bedford's Memorial Park, this retrofit project included the installation of a new Wet Extended Detention Pond. The project also included modifications to the existing stormwater conveyance system in order to direct runoff to the retrofit prior to being discharged to Lake Marie. This project has been approved for final credit by the NYSDEC.

**B-MU-21 (Beaver Dam Road – Year 2)** – Located in the Town of Bedford, this retrofit was originally part of the Year 2 plan. Intended to be completed in Year 3, this project was included in the Solicitation #2 project list and subsequently removed to be completed by the municipality. The retrofit project originally included channel stabilization of an existing drainage course and installation of a Micropool extended Detention Pond and Pocket Pond. The retrofit was revised to subsurface infiltration. Construction was completed in 2013 and this project has been approved for final credit by the NYSDEC.

**B-MU-22 (The Narrows – Year 2)** – Located in the Town of Bedford, this retrofit project includes the installation of a Hydrodynamic Separator and infiltration practices on Town property. Construction was completed in 2013 and this project has been approved for final credit by the NYSDEC.

**B-MU-23 (North Street– Year 1)** – Located in the Town of Bedford, this retrofit project included the installation of brick pavers and perforated pipe underdrain to replace existing concrete gutter along North Street. This project was completed by the municipality, funded by Westchester County, and approved by the NYSDEC.

**B-MU-24 (School Street – Year 1)** – Located in the Town of Bedford, this retrofit project included the installation of brick pavers and perforated pipe underdrain to replace existing concrete gutter along School Street. This project was completed by the municipality, funded by Westchester County, and approved for final credit by the NYSDEC.

**B-MU-25 (Guard Hill Road – Year 1)** – Located in the Town of Bedford, this retrofit project included the stabilization of an existing dirt channel along Guard Hill Road. This project was completed by the municipality, funded by Westchester County, and approved for final credit by the NYSDEC.

## EAST OF HUDSON WATERSHED CORPORATION

**B-MU-28 (High Street/Ridge Street – Year 1)** – Located in the Town of Bedford, this retrofit project included stabilization of an existing earthen channel along High and Ridge Street. This project was completed by the municipality, funded by Westchester County, and approved for final credit by the NYSDEC.

**B-MU-30 (South Church Street – Year 2)** – Located in the Town of Bedford, this retrofit project included installation of a new infiltration basin to treat drainage from South Church Street. This project was completed by the municipality, funded by Westchester County, and approved for final credit by the NYSDEC.

**B-MU-32 (Babitt Road – Year 4)** – Located in the Town of Bedford, this retrofit project included stabilization of an existing earthen channel along Babitt Road. This project was constructed by the municipality in 2013 and has been approved for final credit by the NYSDEC.

**B-MU-33A (Guard Hill East – Year 5)** – Originally part of the Year 4 Plan postponed to Year 5, this SRP is located in the Town of Bedford and includes channel stabilization and construction of a new forebay along Guard Hill and Clark Road. This project is currently in conceptual phase with detailed design and construction expected to be completed between 2015 and 2016.

**B-MU-33B (Sunnyfield Farm – Year 5)** – Located in the Town of Bedford, the proposed SRP is a wet detention pond on private property. This project is currently in conceptual phase with detailed design and construction expected to be completed between 2015 and 2016.

**B-MU-34 (Wood Road – Year 5)** – Originally part of the Year 4 Plan postponed to Year 5, this SRP is located in the Town of Bedford and includes channel stabilization along Wood Road. This project is currently in conceptual phase with detailed design and construction expected to be completed between 2015 and 2016.

**B-MU-35 (Broad Brook Road – Year 5)** – Originally part of the Year 4 Plan postponed to Year 5, this SRP is located in the Town of Bedford and includes channel stabilization and infiltration along Broad Brook Road. This project is currently in conceptual phase with detailed design and construction expected to be completed between 2015 and 2016.

**B-MU-38A (314 Mount Holly Road – Year 5)** – Located in the Town of Bedford, this retrofit project includes construction of a wet extended detention pond on private and public property on Mount Holly Road. This project is currently in conceptual phase with detailed design and construction expected to be completed between 2015 and 2016.

**B-MU-41 (Succabone and Bisbee Road)** – Located in the Town of Bedford, this retrofit project includes subsurface infiltration on public property on Mount Holly Road. This

## EAST OF HUDSON WATERSHED CORPORATION

project is currently in conceptual phase with detailed design and construction expected to be completed between 2015 and 2016.

**B-NCR-27 (South Beach Road – Year 1)** – Located in the Town of Bedford, this retrofit project included stabilization of an existing dirt channel along South Beach Road. This project was completed by the municipality, funded by Westchester County, and approved for final credit by the NYSDEC.

**Carmel-AM-111 (Mahopac Falls Elementary School – Year 4)** – Located in the Town of Carmel, the proposed SRP originally called for construction of a subsurface sand filter to capture runoff from the existing parking lots and school grounds. The project has since split into two separate SRP's following further evaluation of the project site. Descriptions of Carmel-AM-111A and B are provided below.

**Carmel-AM-111A (Mahopac Falls Elementary School – Year 4)** – Located in the Town of Carmel, the proposed SRP includes construction of a new subsurface infiltration system to capture runoff associated with existing and new parking areas and roof runoff from the elementary school buildings. Detailed design of this project is complete and construction is anticipated to commence in 2015.

**Carmel-AM-111B (Mahopac Falls Elementary School – Year 4)** – Located in the Town of Carmel, the proposed SRP includes construction of a new subsurface infiltration system to capture runoff associated with existing parking areas and roof runoff from the high school buildings. Detailed design of the retrofit is in progress and construction is expected to start in 2015, pending acceptance by the owner.

**Carmel-AM-112 (Austin Road Elementary School – Year 3)** – Located in the Town of Carmel, this retrofit project originally called for the installation of a new detention pond upon the initial field evaluation of the site. The proposed practice has since been revised to subsurface infiltration following concerns expressed by the Mahopac Central School District regarding open water hazards directly adjacent to a school building. Construction was completed in 2013 and this project has been approved for final credit by the NYSDEC.

**Carmel-AM-116 (Mahopac Middle School – Year 3)** - Located in the Town of Carmel, this retrofit project originally called for the installation of a new detention pond upon the initial field evaluation of the site. The proposed practice has since been revised to subsurface infiltration. Construction was completed in 2013 and this project has been approved for final credit by the NYSDEC.

**Carmel-AM-125 (Year 2)** - Located in the Town of Carmel, this retrofit project included construction of a detention pond. This project was completed by the municipality and funded by Putnam County. This project has been approved by the NYSDEC.

## EAST OF HUDSON WATERSHED CORPORATION

**Carmel-AM-127 (Year 2)** - Located in the Town of Carmel, this retrofit project included installation of a hydrodynamic separator. This project was cancelled.

**Carmel-AM-129 (Hitchcock Hill Road – Year 1)** – Located in the Town of Carmel, this retrofit project included the installation of a hydrodynamic separator in an existing drainage system along Hitchcock Hill Road. This project was completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC.

**Carmel-CF-102 (Guide Post Seminary – Year 3)** – Located on private property in the Town of Carmel, this retrofit project originally called for the installation of a new detention pond upon initial field evaluation of the site. The project has since split into two separate SRP's following further evaluation of the project site. Descriptions of Carmel-CF-102A and B are provided below.

**Carmel-CF-102A (Guide Post Seminary – Year 3)** – Located in the Town of Carmel, this proposed retrofit project called for channel stabilization on private property on Guide Post Seminary property off of Hill Road. Construction began in late 2014 and is expected to conclude in early 2015.

**Carmel-CF-102B (Guide Post Seminary – Year 3)** – Located in the Town of Carmel, this proposed retrofit project called for channel stabilization on private property on Guide Post Seminary property off of Hill Road. Construction began in late 2014 and is expected to conclude in early 2015.

**Carmel-CF-103 (Putnam Hospital Center – Year 4)** – Located on private property in the Town of Carmel, the proposed SRP is for an extended detention wet pond. The SRP will treat the runoff from a portion of the parking lot and hospital buildings. This project is currently in the design phase and is on hold due to coordination difficulties with the site owner.

**Carmel-CF-113 (Fulmar Road Elementary School – Year 3)** – Located in the Town of Carmel, the proposed SRP originally called for construction of a new detention pond. The project has since split into three separate SRP's following further evaluation of the project site. Descriptions of Carmel-CF-113A through C are provided below.

**Carmel-CF-113A (Fulmar Road Elementary School – Year 3)** – Located in the Town of Carmel, this SRP includes the construction of a new subsurface infiltration system. Detailed design of the retrofit is complete, however construction has been postponed due to the estimated cost of the project.

**Carmel-CF-113B (Fulmar Road Elementary School – Year 3)** – Located in the Town of Carmel, this SRP includes the construction of a new bioretention basin. Detailed design of the retrofit is complete, however construction has been postponed due to the estimated cost of the project.

## EAST OF HUDSON WATERSHED CORPORATION

**Carmel-CF-113C (Fulmar Road Elementary School – Year 3)** – Located in the Town of Carmel, this SRP includes the construction of a new subsurface infiltration system. Detailed design of the retrofit is complete, however construction has been postponed due to the estimated cost of the project.

**Carmel-CF-119B (Kelly Ridge & St. Michael's Terrace – Year 2)** – Located in the Town of Carmel, this retrofit project included the installation of a new detention pond in a residential area by St. Michael's Terrace. Construction was completed in 2014 and this project has been approved for final credit by the NYSDEC.

**Carmel-CF-123 (Garret Place – Year 2)** – Located in the Town of Carmel, this retrofit project included the stabilization of an existing earthen channel along Garret Place. This project was completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC.

**Carmel-CF-124 (Kennicut Hill Road – Year 5)** – Located in the Town of Carmel, the proposed SRP includes the construction of a new Wet Extended Detention Pond. This project is currently in conceptual phase with detailed design and construction expected to be completed between 2015 and 2016.

**Carmel-PA-01 (Shop Rite – Year 3)** – Located in the Town of Carmel, this retrofit project which has been cancelled as an agreement could not be reached with the private property owner.

**Carmel-PA-03 (The Meadows Plaza – Year 4)** – Located in the Town of Carmel, this retrofit project which has been cancelled as an agreement could not be reached with the private property owner.

**Carmel-PA-08 (Carmel HS - Year 4)** – Located in the Town of Carmel, the proposed SRP is for a cistern installation. The project has been cancelled as this is not an accepted SRP.

**Carmel-PRE-02 (Lakeview Court – Year 1)** – Located in the Town of Carmel, this retrofit project included the stabilization of an existing outfall at Lakeview Court. This project was completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC.

**Carmel-PRE-03 (Silvergate Road – Year 1)** – Located in the Town of Carmel, this retrofit project included the stabilization of an existing outfall at Silvergate Road. This project was completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC.

## EAST OF HUDSON WATERSHED CORPORATION

**Carmel-PRE-04 (Red Mills Road – Year 1)** – Located in the Town of Carmel, this retrofit project included the stabilization of an existing outfall at Red Mills Road. This project was completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC.

**Carmel-PRE-06 (Belden Road – Year 1)** – Located in the Town of Carmel, this retrofit project included the stabilization of an existing roadside channel along Belden Road. This project was completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC.

**Carmel-PRE-07 (Colier Drive – Year 1)** – Located in the Town of Carmel, this retrofit project included the stabilization of an existing roadside channel along Belden Road. This project was completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC.

**C-NC-01 (Quarry Acres Subdivision – Year 3)** – Located in the Town of Cortlandt, this project has been cancelled and replaced with C-NC-01B.

**C-NC-01A (Quarry Acres Subdivision – Year 3)** – Located in the Town of Cortlandt, this retrofit originally called for channel stabilization upon initial field evaluation of the site. The proposed practice has since been revised to also include the construction of a Micropool Extended Detention Pond in addition to channel stabilization. Detailed design of the project is complete however construction has been postponed due to the estimated cost of the project.

**C-NC-01B (Quarry Acres Subdivision – Year 3)** – Located in the Town of Cortlandt, this retrofit project replaced C-NC-01. The retrofit includes channel stabilization and the installation of a Micropool Extended Detention Pond. Detailed design of the project is complete and construction is expected to begin in 2015.

**C-NC-05A (Correia Building Site – Year 5)** – Located in the Town of Cortlandt, this retrofit project includes the construction of a wet pond on private property. Detailed design of the project is complete and construction is expected to begin in 2015.

**Kent-MB-Add 2 (Lake Shore Drive & Cottage Road – Year 3)** – Located in the Town of Kent, this retrofit includes the installation of Wet Extended Detention Pond (P-3). Construction was completed in 2013 and this project has been approved for final credit by the NYSDEC.

**Kent-MB-Add-3 (Lake Shore Drive and Valhalla Road – Year 3)** – Located in the Town of Kent, this retrofit project includes the installation of a new Micropool Extended Detention Pond on Town property. Construction was completed in 2013 and this project has been approved for final credit by the NYSDEC.

## EAST OF HUDSON WATERSHED CORPORATION

**Kent-MB-Add-4 (Ryan Park – Year 3)** – Located in the Town of Kent’s Ryan Park, this retrofit includes the installation of a Hydrodynamic Separator. Construction was completed in 2013 and this project has been approved for final credit by the NYSDEC.

**Kent-MB-Add 5 (Kent Recreation Building – Year 3)** – Located in the Town of Kent, this retrofit includes the installation of a Dry Swale on Town property. Construction was completed in 2013 and this project has been approved for final credit by the NYSDEC.

**Kent-MB-Add-19 (Ryan Park – Year 3)** – Located in the Town of Kent’s Ryan Park, this retrofit project includes the removal of an existing eroded channel and installation of a new sand filter. Construction was completed in 2013 and this project has been approved for final credit by the NYSDEC.

**Kent-MB-2 (Putnam Drive – Year 4)** – Located in the Town of Kent, the proposed SRP is for the installation of a hydrodynamic separator. This project has been cancelled due to site constraints.

**Kent-MB-3 (Sebago Drive – Year 4)** – Located in the Village of Kent, the proposed SRP is for a wet swale near the intersection of Sebago Road and State Route 311 in Kent, NY. This project has been cancelled due to site constraints.

**Kent-MB-311B (State Route 311 and I-84 – Year 4)** – Located in the Village of Kent, the proposed SRP has 3 major components; a new wet detention pond, channel stabilization, and pond enlargement. Drainage from an existing residential area has created an erosion channel which is to be repaired and runoff redirected to an engineered channel. This channel will lead to a newly constructed stormwater pond for treatment. The existing stormwater pond at the intersection of Route 311 and Interstate 84 will also be expanded to treat runoff from developed areas which currently bypass the existing pond. This project is currently in the design phase.

**Kent-MB-NLC (North Lake Carmel Stormwater Improvements – Year 2)** – Located in the Town of Kent, this retrofit project included multiple improvements to the North Lake Carmel Stormwater system. This project was completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC.

**Kent-PA-31 (Putnam Stone & Mason Supply – Year 3)** – Located in the Town of Kent, the proposed retrofit originally included a Dry Swale (O-1). The project has been revised to a Wet Swale (O-2). Detailed design of the revised practice is complete and construction is expected to start in 2015.

**Kent-PRE-06a (202 Boyds Corner Road – Year 1)** – Located in the Town of Kent, this retrofit project included outfall stabilization. This project was completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC.

## EAST OF HUDSON WATERSHED CORPORATION

**Kent-PRE-06b (236 Boyds Corner Road – Year 1)** – Located in the Town of Kent, this retrofit project included outfall stabilization. This project was completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC.

**Kent-PRE-06c (322 Boyds Corner Road – Year 1)** – Located in the Town of Kent, this retrofit project included outfall stabilization. This project was completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC.

**Kent-PRE-06d (326 Boyds Corner Road – Year 1)** – Located in the Town of Kent, this retrofit project included outfall stabilization. This project was completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC.

**Kent-PRE-06e (Farmers Mills Road – Year 1)** – Located in the Town of Kent, this retrofit project included channel stabilization. This project was completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC.

**Kent-PRE-06f (Meadow Brook Court – Year 1)** – Located in the Town of Kent, this retrofit project included outfall stabilization. This project was completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC.

**Kent-PRE-03 (Barrett Hill/Route 52 – Year 1)** – Located in the Town of Kent, this retrofit project included the installation of a hydrodynamic separator. This project was completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC.

**L-CR-10A (The Meadows Subdivision – Year 4)** – Located in the Town of Lewisboro, the proposed SRP is a micropool extended detention pond located south of Winterberry Court in The Meadows Subdivision in Lewisboro, NY. This has been cancelled.

**L-CR-10B (The Meadows Subdivision – Year 4)** – Located in the Town of Lewisboro, the proposed SRP is a micropool extended detention pond located north of Winterberry Court in The Meadows Subdivision in Lewisboro, NY. This project has been cancelled.

**L-CR-11A (John Jay High and Middle School – Year 4)** – Located in the Town of Lewisboro, the proposed SRP is for the expansion of an existing micropool extended detention pond. Construction was completed in 2014.

**L-CR-11B (John Jay High and Middle School – Year 4)** – Located in the Town of Lewisboro, The proposed SRP originally called for bioretention. The project has since been revised to include the construction of a new Wet Extended Detention Pond. Construction was completed in 2014.

## EAST OF HUDSON WATERSHED CORPORATION

**L-CR-11C (John Jay High and Middle School – Year 4)** – Located in the Town of Lewisboro, the proposed SRP includes stabilization of approximately 330 linear feet of an existing eroded drainage channel. Construction was completed in 2014.

**L-CR-11D (John Jay High and Middle School – Year 4)** – Located in the Town of Lewisboro, the proposed SRP is a subsurface infiltration system. This project has subsequently been cancelled during the design phase due to unsuitable soil conditions.

**L-CR-11E (John Jay High and Middle School – Year 4)** – Located in the Town of Lewisboro, the proposed SRP is a pocket pond. The project site is adjacent to North Salem Road. This project has subsequently been cancelled during the design phase due to existing site constraints.

**L-CR-13 (Tator Dodge – Year 4)** – Located in the Town of Lewisboro, this project has been cancelled following an initial evaluation.

**L-CR-14 (Lewisboro Highway Garage – Year 3)** – Located in the Town of Lewisboro, this retrofit originally included an infiltration practice. The project has been revised to a Sub-surface Sand Filter. This project has subsequently been cancelled during the design phase following a cost analysis evaluating the efficiency of the proposed retrofit.

**L-CR-15 (Twin Lakes Road – Year 1)** – Located in the Town of Lewisboro, this retrofit project included the installation of riprap and grass swales along Twin Lakes Road to direct runoff to a new plunge pool and level spreader. This project was completed by the municipality, funded by Westchester County, and approved for final credit by the NYSDEC.

**L-CR-16 (Old Pond Road – Year 3)** – Located in the Town of Lewisboro, this retrofit originally included channel stabilization. The project has been revised to a Pocket Pond (P-5) on private property. This project has subsequently been cancelled during the design phase following a cost analysis evaluating the efficiency of the proposed retrofit.

**L-CR-17 (Tarry-A-Bit Drive – Year 3)** – Located in the Town of Lewisboro, this retrofit includes channel stabilization. This SRP was cancelled by EOHWC due to site constraints and impact to private property.

**L-CR-21 (Lake Kitchawan Stream – Year 1)** – Located in the Town of Lewisboro, this retrofit project included a Vortec Hydrodynamic Separator and basin, discharging to the lake. This project was completed by the municipality, funded by Westchester County, and approved for final credit by the NYSDEC.

## EAST OF HUDSON WATERSHED CORPORATION

**L-CR-25 (Truesdale Lake and Lakeshore Drive –Year 3)** – Located in the Town of Lewisboro, this retrofit includes a Hydrodynamic Separator. This SRP was cancelled by EOHWC due to site constraints.

**L-CR-26 (Truesdale Lake Drive – Year 1)** – Located in the Town of Lewisboro, this retrofit project included the stabilization of an existing eroded channel and installation of a new hydrodynamic separator along Truesdale Lake Drive. This project was completed by the municipality, funded by Westchester County, and approved for final credit by the NYSDEC.

**L-CR-28 (Schoolhouse Road – Year 4)** – Located on private property in the Town of Lewisboro, the proposed SRPs originally included two pocket wetland systems. The project has since been revised to include the construction of a new Wet Extended Detention Pond and Micropool Extended Detention Pond. This project is currently in the design phase with construction expected to take place in 2015.

**L-CR-29 (Salem Hill Road – Year 5)** – Located on private property in the Town of Lewisboro, the proposed SRP includes the construction of a new Wet Extended Detention Pond. This project is currently in conceptual phase with detailed design and construction expected to be completed between 2015 and 2016.

**L-CR-30 (Mead Street – Year 5)** – Located on private property in the Town of Lewisboro, the proposed SRP includes the construction of a new Extended Detention Shallow Wetland. Detailed design was completed by the municipality and construction is expected to be completed in 2015.

**MK-NC-06 (The Park – Year 4)** – Located in the Town of Mount Kisco, the proposed SRP is for subsurface infiltration. The project has been cancelled due to its location on private property.

**MK-NC-07 (The Commons – Year 4)** – Located in the Town of Mount Kisco, the proposed SRP is for subsurface infiltration. The project has been cancelled due to its location on private property.

**MK-NC-09 (American Legion Building – Year 3)** - Located in the Village of Mount Kisco, this project has been cancelled as it is located within a classified stream, and an alternative project location could not be identified.

**MK-NC-14 (Sunny Ridge Road – Year 4)** – Located in the Town of Mount Kisco, the proposed SRP is for two bioretention areas. This project has been cancelled due to its location on private property.

## EAST OF HUDSON WATERSHED CORPORATION

**MK-NC-15 (Village Sewer Pump Station Driveway Stabilization – Year 1)** – Located in the Village of Mount Kisco, this retrofit project included the stabilization of an existing dirt driveway at the Village sewer pump station with asphalt millings. This project was completed by the municipality, funded by Westchester County, and approved by the NYSDEC.

**MK-NC-18 (Hillside Water Tower Access Driveway Stabilization – Year 1)** – Located in the Village of Mount Kisco, this retrofit project included the stabilization of an existing earthen access driveway to the Hillside Water Tower with asphalt millings. This project was completed by the municipality, funded by Westchester County, and approved for final credit by the NYSDEC.

**MK-NC-19 (Village Sewer Pump Station Rooftop Disconnect – Year 1)** – Located in the Village of Mount Kisco, this retrofit project included disconnecting a roof drain that previously discharged to a wetland. This project was completed by the municipality, funded by Westchester County, and approved for final credit by the NYSDEC.

**MK-NC-20 (CVS, South Bedford Road – Year 4)** – Located in the Village of Mount Kisco, the proposed SRP is for channel stabilization on an existing drainage channel located on private property. This project is currently in the design phase.

**MK-NC-21 (Mt. Kisco Medical Group Satellite Office – Year 4)** – Located in the Village of Mount Kisco, the proposed SRP is a pocket wetland. The engineered wetland will replace an unclassified manmade wetland. The project is currently in the design phase.

**MK-NC-22 (Leonard Park – Year 4)** – Located in the Village of Mount Kisco, the proposed SRPs are one dry swale, six surface sand filters, and eight bioretention areas. This project is currently in the design phase.

**MK-NC-23 (Leonard Park Driveway Stabilization – Year 1)** – Located in the Village of Mount Kisco, this retrofit project included the stabilization of an existing dirt driveway in Leonard Park with asphalt millings. This project was completed by the municipality, funded by Westchester County, and approved for final credit by the NYSDEC.

**MK-NC-24 (Leonard Park Pavement Removal – Year 1)** – Located in the Village of Mount Kisco, this retrofit project included the removal of an asphalt path in Leonard Park, restoring the area to grass lawn area. This project was completed by the municipality, funded by Westchester County, and approved for final credit by the NYSDEC.

**MK-NC-25 (Mount Kisco Medical Group – Year 4)** – Located in the Village of Mount Kisco, the proposed SRP is for the design of two hydrodynamic separators to be located on private property. This project has been cancelled.

## EAST OF HUDSON WATERSHED CORPORATION

**MK-NC-28 (Chase Subdivision – Year 4)** – Located in the Village of Mount Kisco, the proposed SRP calls for the water quality treatment of a paved access road which has been installed on private property. This project has been cancelled due to site constraints.

**MK-NC-29 (Mount Kisco DPW Yard – Year 4)** – Located in the Village of Mount Kisco, the proposed SRP is a wet pond. The Village began design in 2013 and construction is expected to begin in 2015.

**MK-NC-30 (71 Maple Ave – Year 4)** – Located in the Village of Mount Kisco, the proposed SRP called for the removal of existing impervious area. This is not an eligible SRP and therefore has been removed from our list of potential projects.

**MK-NC-31 (Perforated Drain Pipe Installation – Year 1)** – Located in the Village of Mount Kisco, this retrofit project included the installation of perforated drain pipe whenever the Village replaced existing pipes to provide infiltration. This project was completed by the municipality, funded by Westchester County, and approved for final credit by the NYSDEC.

**MK-NC-32 (Infiltration for House Additions – Year 1)** – The Village of Mount Kisco now requires any house addition to infiltrate runoff from any increase in impervious surfaces.

**MK-NC-33 (Brook Street – Year 4)** – Located in the Village of Mount Kisco, the proposed SRP is channel stabilization to take place on municipal and private property. The Village began design in 2013 and construction is expected to begin in 2015.

**MK-NC-34 (Leonard Park Riparian Buffer – Year 4)** – Located in the Village of Mount Kisco, the proposed SRP was the installation of a riparian buffer around an existing pond in Leonard Park. This is not an eligible SRP and therefore has been removed from our list of potential projects.

**NewC-NCR-04A (Millwood Business Center – Year 4)** – Located in the Town of New Castle, the proposed SRP is a pocket pond. This project has been cancelled due to its location on private property.

**NewC-NCR-04B (Millwood Business Center – Year 4)** – Located in the Town of New Castle, the proposed SRP is a wet detention pond. This project has been cancelled due to its location on private property.

**NewC-NCR-05A (Westorchard School – Year 5)** – Located in the Town of New Castle, the proposed SRP includes the construction of a new subsurface infiltration

## EAST OF HUDSON WATERSHED CORPORATION

system. This project is currently in conceptual phase with detailed design and construction expected to be completed between 2015 and 2016.

**NewC-NCR-05B (Westorcharde School – Year 5)** – Located in the Town of New Castle, the proposed SRP includes the construction of a new dry swale. This project is currently in conceptual phase with detailed design and construction expected to be completed between 2015 and 2016.

**NewC-NCR-07 (Seven Bridges School – Year 4)** – Located in the Town of New Castle, the proposed SRP is for an increase in storage capacity of an existing pond system. This project has been cancelled due to site constraints.

**NewC-NCR-08 (Random Farms – Year 4)** – Located in the Town of New Castle, the proposed SRP is for the construction of a forebay to an existing pond system. Based upon the feasibility and location of the project, it has been cancelled.

**NewC-NCR-12A (Horace Greeley High School – Year 4)** – Located in the Town of New Castle, the SRP originally called for the installation of a Wet Detention Pond. The project has since been revised to bioretention. Detailed design of the project has been completed, however the project was cancelled due to high construction costs.

**NewC-NCR-12B (Horace Greeley High School – Year 4)** – Located in the Town of New Castle, the original SRP is for a subsurface sand filter which has been revised to bioretention and underground infiltration. This project was subsequently cancelled during the design phase as it was deemed to not be viable upon further evaluation.

**NewC-NCR-12C (Horace Greeley High School – Year 4)** – Located in the Town of New Castle, the proposed SRP is for subsurface infiltration. Detailed design of the project has been completed, however the project was cancelled due to high construction costs.

**NewC-NCR-13 (New Castle DPW – Year 4)** – Located in the Town of New Castle, the proposed SRP is for the construction of a dry swale on the grounds of the DPW yard. This project has been cancelled.

**NewC-NCR-19A (Fox Den Road – Year 4)** – Located in the Town of New Castle, the proposed SRP is a wet extended detention pond. This project has been cancelled due to its location on private property.

**NewC-NCR-32-2A (Old Roaring Brook Road – Year 4)** – Located in the Town of New Castle, the proposed SRP is a bioretention area. This project has subsequently been cancelled during the design phase following a cost analysis evaluating the efficiency of the proposed project.

## EAST OF HUDSON WATERSHED CORPORATION

**NewC-NCR-32-2B (Old Roaring Brook Road – Year 4)** – Located in the Town of New Castle, the proposed SRP is a pocket pond installed on private property. This project has subsequently been cancelled during the design phase following a cost analysis evaluating the efficiency of the proposed project.

**NewC-NCR-32-3 (Old Roaring Brook Road – Year 4)** – Located in the Town of New Castle, the proposed SRP is a pocket pond installed on private property. This project has subsequently been cancelled during the design phase following a cost analysis evaluating the efficiency of the proposed project.

**NewC-NCR-32-4 (Old Roaring Brook Road – Year 4)** – Located in the Town of New Castle, the proposed SRP is a pocket pond installed on private property. This project has subsequently been cancelled during the design phase following a cost analysis evaluating the efficiency of the proposed project.

**NewC-NCR-33A (Burden Preserve – Year 5)** – Located in the Town of New Castle, the proposed SRP includes channel stabilization on public property. This project is currently in conceptual phase with detailed design and construction expected to be completed between 2015 and 2016.

**NewC-NCR-33B (Burden Preserve – Year 5)** – Located in the Town of New Castle, the proposed SRP includes channel stabilization on public property. This project is currently in conceptual phase with detailed design and construction expected to be completed between 2015 and 2016.

**NS-MU-01A (Back Street & West Cross Street – Year 3)** – Located in the Town of North Salem, this retrofit project includes the installation of a new Extended Detention Pond on NYCDEP property. This project has subsequently been cancelled during the design phase following a cost analysis evaluating the efficiency of the proposed project.

**NS-MU-01B (Back Street & West Cross Street – Year 3)** – Located in the Town of North Salem, this retrofit originally included the installation of an infiltration practice on NYCDEP property. The project has been revised to a Surface Sand Filter. Detailed design of the revised practice is in progress and construction is expected to start in 2015.

**NS-MU-01C (Front Street – Year 3)** – Located in the Town of North Salem, this retrofit project includes the installation of a Bioretention practice on NYCDEP property. This project has subsequently been cancelled during the design phase following a cost analysis evaluating the efficiency of the proposed project.

## EAST OF HUDSON WATERSHED CORPORATION

**NS-MU-05 (North Salem DPW – Year 4)** – Located in the Town of North Salem, the proposed SRP included subsurface infiltration and a micropool extended detention basin. This project has been executed by the Town of North Salem as part of a greater construction effort at their DPW yard and was constructed in 2014. This project has been approved for final credit by the NYSDEC.

**NS-MU-08/09 (Sunset Drive and Westview Cross Road – Year 2)** - Located in the Town of North Salem, this retrofit project included rehabilitation of existing eroded drainage channels. This project was completed by the municipality and approved for final credit by NYSDEC.

**NS-MU-10 (Ridgeway Ave Culvert – Year 3)** – Located in the Town of North Salem, this retrofit has been cancelled as it was located in a classified stream.

**NS-MU-11 (Hand Scrabble Road Park – Year 3)** – Located in the Town of North Salem’s Hand Scrabble Road Park, this retrofit includes the installation of a new Extended Detention Pond. Detailed design of the practice is in progress and construction is expected to start in 2015.

**Pat-EB-09-01 (Big Elm Road –Year 3)** – Located in the Town of Patterson, this retrofit includes the installation of a new Pocket Pond (P-5) on Town property. Construction for this project was completed in 2014. This project has been approved for final credit by the NYSDEC.

**Pat-EB-09-02 (Patterson Fire Department – Year 3)** – Located in the Town of Patterson, this retrofit includes the installation of a new Pocket Pond on private property. This project has been cancelled due to issues obtaining the needed easements.

**Pat-EB-09-03 (Veteran’s Memorial Park – Year 4)** – Located in the Town of Patterson, the proposed SRP originally called for construction of a pocket pond to treat runoff from the existing parking lots and park grounds. The project has since split into two separate SRP’s following further evaluation of the project site. Descriptions of Pat-EB-09-03A and B are provided below.

**Pat-EB-09-03A (Veteran’s Memorial Park – Year 4)** – Located in the Town of Patterson, the proposed SRP is for a subsurface infiltration system. Detailed design for this project has been completed and construction is anticipated to commence in 2015.

**Pat-EB-09-03B (Veteran’s Memorial Park – Year 4)** – Located in the Town of Patterson, the proposed SRP is for a bioretention area. Detailed design for this project has been completed and construction is anticipated to commence in 2015.

**Pat-EB-09-04a/04b/04c (Old Route 222 Modified Grass Swale – Year 2)** Located in the Town of Patterson this retrofit project included several modified grass swales along

## EAST OF HUDSON WATERSHED CORPORATION

Old Route 22 to replace existing eroded swales. This project was completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC.

**Pat-MB-05 (Gottwald Property –Year 3)** – Located in the Town of Patterson, this retrofit project includes the installation of a new Pocket Pond on private property. Project has been cancelled due to issues obtaining the needed easements.

**Pat-MB-06 (Fields Corner Road –Year 3)** – Located in the Town of Patterson, this retrofit project includes the installation of a Dry Swale on Town property. Construction for this project was completed in 2014. This project has been approved for final credit by the NYSDEC.

**PATTERSON-PA-03D (465 Lake Shore Drive – Year 4)** Located in the Town of Patterson, this SRP calls for the installation of a plunge pool. This is no longer an approved SRP and has been cancelled. The site may be re-evaluated for a different SRP.

**Patterson-PA-10 (Patterson Town Hall – Year 2)** – Located in the Town of Patterson, this retrofit includes the installation of an infiltration practice. The project was completed by the Patterson Highway Department in 2013 and approved for final credit by the NYSDEC.

**Patterson-PA-11 (Patterson Highway Garage – Year 3)** – Located in the Town of Patterson, this retrofit includes the installation of two pocket ponds and bioretention. Construction was completed in 2013 and approved for final credit by the NYSDEC.

**Patterson-PA-15A (Matthew Patterson Elementary School – Year 5)** – Originally part of the Year 4 Plan postponed to Year 5, this SRP is located in the Town of Patterson and includes construction of a grass swale. This project is currently in conceptual phase with detailed design and construction expected to be completed between 2015 and 2016.

**Patterson-PA-15B (Matthew Patterson Elementary School – Year 5)** – Originally part of the Year 4 Plan postponed to Year 5, this SRP is located in the Town of Patterson and includes construction of a bioretention basin. This project is currently in conceptual phase with detailed design and construction expected to be completed between 2015 and 2016.

**Pat-PRE-02 (T&T Associates – Year 1)** – Located in the Town of Patterson, this retrofit project included the installation of grass swale. This project was completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC.

**Pat-PRE-03 (Brewster Plastics – Year 1)** – Located in the Town of Patterson, this retrofit project included the installation of new detention pond. This project was

## EAST OF HUDSON WATERSHED CORPORATION

completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC..

**Pat-PRE-04 (White Birch Realty – Year 1)** – Located in the Town of Patterson, this retrofit project included the installation of sand filter. This project was completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC..

**Pat-PRE-05 (T&T Associates – Year 1)** – Located in the Town of Patterson, this retrofit project included the installation of grass swale. This project was completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC..

**Pat-PRE-06a-j (Putnam Lake – Year 1)** – Located in the Town of Patterson, this retrofit project included the installation of multiple detention ponds and hydrodynamic separators at various sites around Putnam Lake. This project was completed by the municipality, funded by Putnam County, and and approved for final credit by the NYSDEC..

**PC-1 (Putnam National Golf Course – Year 3)** – Located in the Town of Carmel, this retrofit project originally called for the conversion of approximately two acres of gravel parking lot to porous asphalt. The project was revised to subsurface infiltration. Construction of this project was completed in 2014. This project has been approved for final credit by the NYSDEC.

**PC-1A (Putnam National Golf Course – Year 3)** – Located in the Town of Carmel, this retrofit project includes the installation of a Wet Extended Detention Pond on the golf course. Construction of this project was completed in 2014. This project has been approved for final credit by the NYSDEC.

**PC-3 (Milltown Road – Year 4)** – Located in the Town of Southeast, the proposed SRP was a channel stabilization and dry swale. This SRP has been cancelled due to site constraints.

**PC-4 (T&T Associates – Year 1)** – Located in the Town of Southeast, this retrofit project included channel stabilization. This project was completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC.

**PC-5N,5S (Putnam County Highway Department – Year 4)** – Located in the Town of Patterson, the proposed SRPs are for two wet extended detention ponds. This project has completed design by the County and is scheduled for construction in 2015.

**PC-6 (T&T Associates – Year 1)** – Located in the Town of Carmel, this retrofit project included the removal of existing impervious area. This project was completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC.

## EAST OF HUDSON WATERSHED CORPORATION

**PC-9 (T&T Associates – Year 1)** – Located in the Town of Kent, this retrofit project included the installation of a sand filter. This project was completed by the municipality, funded by Putnam County, and approved for final credit by the NYSDEC.

**PC-10 (Donald Smith Campus – Year 3)** – Located in the Town of Carmel, this retrofit includes the installation of a new grass swale on County property. The project has been cancelled by EOHWC due to site constraints.

**PC-12 (Putnam County EOC – Year 3)** – Located in the Town of Carmel, this retrofit includes the conversion of an existing dry basin to wet detention pond on County property. The project has been cancelled by EOHWC due to site constraints.

**PC-11B (Multiple Roads – Year 4)** – Located in the Town of Kent, the proposed SRP was for the stabilization of 2 earthen channels and outfall stabilization. The projects have been cancelled due to site constraints.

**PC-11C-1 (Ninham Field HQ – Year 4)** - Located in the Town of Kent, the proposed SRP is for the stabilization of an existing outfall. This project has been cancelled due to site constraints.

**PC-11C-2 (Crane Road/Pennebrook Lane – Year 4)** - Located in the Town of Kent, the proposed SRP is for the stabilization of an existing outfall. This project has been cancelled due to site constraints.

**PC-11C-3 (Long Pond Road – Year 4)** - Located in the Town of Carmel, the proposed SRP is for the stabilization of an existing outfall. This project has been cancelled due to site constraints.

**PC-17 (Fair Street/Fields Corner – Year 4)** – Located in the Town of Patterson, the proposed SRP is for the stabilization of an existing outfall. This SRP has been cancelled because there is currently a Year 3 practice at this location.

**PC-22 (Peaceable Hill Road – Year 5)** – Located in the Town of Southeast, the proposed SRP includes the construction of a new wet pond. This project is currently in conceptual phase with detailed design and construction expected to be completed between 2015 and 2016.

**PutVal-PA-02 (Greenway Terrace – Year 2)** – Located in the Town of Putnam Valley, this retrofit practice included the installation of a Stormfilter unit to treat runoff from Greenway Terrace. Detailed design has been complete, however construction has been postponed after a cost analysis of the project.

## EAST OF HUDSON WATERSHED CORPORATION

**PW-82 (39 Sans Souci Drive – Year 2)** – Located in the Town of Pawling, this retrofit project included channel stabilization and outfall protection. This project was completed by the municipality, funded by Dutchess County, and approved for final credit by the NYSDEC.

**PW-83 (47 Sans Souci Drive – Year 2)** – Located in the Town of Pawling, this retrofit project included channel stabilization and outfall protection. This project was completed by the municipality, funded by Dutchess County, and approved for final credit by the NYSDEC.

**PW-120 (138 South Harmony Road – Year 2)** – Located in the Town of Pawling, this retrofit project included outfall protection and new pipe installation, as well as channel stabilization. This project was completed by the municipality, funded by Dutchess County, and approved for final credit by the NYSDEC.

**PW-342A (Pawling Fire District – Year 5)** – Located in the Town of Pawling, the proposed SRP includes the construction of a new pocket pond. This project is currently in conceptual phase with detailed design and construction expected to be completed between 2015 and 2016.

**PW-342B (Pawling Fire District – Year 5)** – Located in the Town of Pawling, the proposed SRP includes the construction of a new dry swale. This project is currently in conceptual phase with detailed design and construction expected to be completed between 2015 and 2016.

**PW-343 (Holmes Whaley Lake Civic Association – Year 5)** – Located in the Town of Pawling, the proposed SRP includes the construction of a new stormwater infiltration system. This project is currently in conceptual phase with detailed design and construction expected to be completed between 2015 and 2016.

**S-MU-01 (Somers Town Hall – Year 3)** – Located in the Town of Somers, originally the retrofit project was Bioretention. The project was revised to permeable pavement. Construction was completed in 2013. This project has been approved for final credit by the NYSDEC.

**S-MU-03 (BOCES – Year 4)** – Located in the Town of Somers, this retrofit project originally called for the installation of several porous pavement parking lots. Due to site constraints and concerns from the owner, the retrofit was revised to channel stabilization. Construction of this project was completed in 2014.

**S-MU-09A (Reis Park – Library Roof Disconnect – Year 3)** – Located at the Town of Somers' Reis Park, the original retrofit project was subsurface infiltration. Construction was completed in 2013. This project has been approved for final credit by the NYSDEC.

## EAST OF HUDSON WATERSHED CORPORATION

**S-MU-09B (Reis Park – Maintenance Building and Parking Area – Year 3) –** Located at the Town of Somers’ Reis Park, the retrofit project was subsurface infiltration. Construction was completed in 2013. This project has been approved for final credit by the NYSDEC.

**S-MU-09C (Reis Park – Main Parking Lot and Tennis Court – Year 3) –** Located at the Town of Somers’ Reis Park, originally the retrofit project included Bioretention. The proposed practice was revised to permeable pavement with infiltration. Construction completed in 2013. This project has been approved for final credit by the NYSDEC.

**S-MU-09D (Reis Park – Main Driveway and Rear Parking Lot – Year 3) –** Located at the Town of Somers’ Reis Park, this retrofit project includes the installation of a Bioretention practice. Construction was completed in 2013. This project has been approved for final credit by the NYSDEC.

**S-MU-09E (Reis Park and Town Hall Porous Pavement – Year 3) –** Located at the Town of Somers’ Reis Park, this retrofit has been renamed “**Reis Park – Middle Driveway**” and originally included Bioretention and infiltration practices. The proposed practice has since been revised to Bioretention only. Construction was completed in 2013. This project has been approved for final credit by the NYSDEC.

**S-MU-09F (Reis Park – Athletic Fields – Year 3) –** Located at the Town of Somers’ Reis Park, original the retrofit project was for Bioretention and infiltration practice. The proposed practice has since been revised to only include the installation of Bioretention practices due to site constraints. Construction completed in 2013. This project has been approved for final credit by the NYSDEC.

**S-MU-09G (Reis Park – Pony Fields – Year 3) –** Located at the Town of Somers’ Reis Park, this retrofit called for the installation of a infiltration trench. This project has been cancelled.

**S-MU-12 (Plumbrook Pond Ditch Stabilization 1 – Year 1) –** Located in the Town of Somers, this retrofit project was for channel stabilization. This project was completed by the municipality, funded by Westchester County, and approved for final credit by the NYSDEC.

**S-MU-13 (Plumbrook Pond Ditch Stabilization 2 – Year 1) –** Located in the Town of Somers, the retrofit project was for the stabilization of existing eroded drainage channels with riprap near the Somers School District Bus Garage. This project was completed by the municipality, funded by Westchester County, and approved for final credit by the NYSDEC.

## EAST OF HUDSON WATERSHED CORPORATION

**S-MU-16/17 (Somers Town Highway garage and Material Yard –Year 3)** – Located in the Town of Somers, originally the retrofit project was for installation of both infiltration and Bioretention practices. The proposed practices were revised to a Multiple Pond System. Construction of this project was completed in 2014.

**S-MU-27a (Somers School District Ditch Stabilization – Year 1)** – Located in the Town of Somers, the retrofit project was for the stabilization of existing earthen drainage channels at the Somers School Campus. This project was completed by the municipality, funded by Westchester County, and approved for final credit by the NYSDEC.

**S-MU-27b (Somers School District Ditch Stabilization – Year 1)** – Located in the Town of Somers, the retrofit project was for stabilization of existing earthen drainage channels at the Somers School Campus. This project was completed by the municipality, funded by Westchester County, and approved for final credit by the NYSDEC.

**S-MU-29 (Plum Brook Road Retrofit – Year 1)** – Located in the Town of Somers, this retrofit project was for stabilization of existing earthen drainage channels along Plum Brook Road. This project was completed by the municipality, funded by Westchester County, and approved for final credit by the NYSDEC.

**S-MU-30 (Jan Ridge Road Brook Stabilization – Year 2)** – Located in the Town of Somers, this retrofit project was for stabilization of existing earthen brook near Jan Ridge Road. This project was completed by the municipality, funded by Westchester County, and approved for final credit by the NYSDEC.

**S-MU-32 (Erosion Control Near Muscoot River – Year 1)** – Located in the Town of Somers, the retrofit project was for stabilization of existing earthen drainage channels near Wood Street. This project was completed by the municipality, funded by Westchester County, and approved for final credit by the NYSDEC.

**S-MU-33 (Van Tassell Memorial Park – Year 5)** – Originally part of the Year 4 Plan postponed to Year 5, this SRP is located in the Town of Somers and includes construction of a new porous pavement area and associated subsurface infiltration system. This project is currently in conceptual phase with detailed design and construction expected to be completed between 2015 and 2016.

**S-MU-34 (Veronica Drive – Year 4)** – Located in the Town of Somers, the proposed SRP is for subsurface infiltration. This project has been cancelled due to its location on private property.

**S-MU-35 (Lake Lincolndale – Year 4)** – Located in the Town of Somers, the proposed SRP included multiple bioretention cells and pocket ponds along Tulip Road, west of

## EAST OF HUDSON WATERSHED CORPORATION

Lake Lincolndale. The SRP was modified to upgrading the existing channel/ditch conveyance system to divert runoff to the desired locations. The project has been cancelled due to site constraints.

**S-MU-36 (Lower Moseman – Year 4)** – Located in the Town of Somers, the proposed SRP is for channel stabilization at multiple areas along Moseman Avenue. This project is currently in the design phase.

**S-MU-NP3 (North and South Hill Drainage Basin –Year 3)** – Located in the Town of Somers, originally the retrofit project was a Multiple Pond System for both North and South sites. The project has been cancelled.

**S-NC-31 (Moseman Avenue Water Quality Improvement – Year 1)** – Located in the Town of Somers, this retrofit project included the installation of a new micro pool prior to an existing pond near Moseman Ave. This project was completed by the municipality, funded by Westchester County, and approved for final credit by the NYSDEC.

**S-NC-NP4 (North Lane – Year 3)** – Located in the Town of Somers, this retrofit includes the installation of swales and detention ponds on Town property. The project has been cancelled.

**SE-DI-03 (Lincoln Road – Year 2)** – Located in the Town of Southeast, this retrofit project was originally part of the Year 2 plan and includes the installation of Hydrodynamic Separator and channel stabilization. This project was completed by the municipality, funded by Westchester County, and approved by the NYSDEC.

**SE-POT-01 (Lake Tonetta – Year 3)** – Located in the Town of Southeast, this retrofit project includes a subsurface gravel wetland stormwater treatment system. Construction of this project was completed in 2014 and approved for final credit by the NYSDEC.

**SE-POT-02 (Brewster Heights – Year 2)** – Located in the Town of Southeast, this retrofit project was originally part of the Year 2 plan and includes the installation of Hydrodynamic Separator and channel stabilization on both Town and private property. This project is currently in the design phase.

**SE-POT-06 (Nichols Road – Year 3)** – This project was removed from Solicitation #1 project list under the original Year 3 Plan by the PCMS4CC-STAC, and has not been replaced.

**SE-POT-07 (Allview Avenue – Year 4)** – Located in the Town of Southeast, the proposed SRP is for a plunge pool. This is no longer an accepted SRP design and the project has been cancelled.

## EAST OF HUDSON WATERSHED CORPORATION

**SE-POT-08 (Cobb Road – Year 4)** – Located in the Town of Southeast, the proposed SRP is for a wetland system or a pocket pond to be installed on private property. This project has been cancelled.

**SE-POT-09A (Ice Pond Road – Year 4)** – Located in the Town of Southeast, the proposed SRP is for outfall stabilization. This project has been cancelled due to site constraints.

**SE-POT-09B (Ice Pond Road – Year 4)** – Located in the Town of Southeast, the proposed SRP is for outfall stabilization. This project has been cancelled due to site constraints.

**SE-PRE-01 (Lower Mine Road – Year 1)** – Located in the Town of Southeast, this retrofit project included outfall stabilization. This project was completed by the municipality and funded by County. This project has been approved for final credit by the NYSDEC.

**SE-PRE-02 (Seven Oaks Lane – Year 1)** – Located in the Town of Southeast, this retrofit project included outfall stabilization and installation of deep sump catch basins. This project was completed by the municipality and funded by County. This project has been approved for final credit by the NYSDEC.

**SE-PRE-03 (Maple Road – Year 1)** – Located in the Town of Southeast, this retrofit project included outfall stabilization and installation of deep sump catch basins. This project was completed by the municipality and funded by County. This project has been approved for final credit by the NYSDEC.

**SE-PRE-04 (Joe's Hill Road – Year 1)** – Located in the Town of Southeast, this retrofit project included outfall stabilization. This project was completed by the municipality and funded by County. This project has been approved for final credit by the NYSDEC.

**SE-PRE-05 (Nichols Road – Year 1)** – Located in the Town of Southeast, this retrofit project included outfall stabilization. This project was completed by the municipality and funded by County. This project has been approved for final credit by the NYSDEC.

**SE-PRE-06 (Cobb Road – Year 1)** – Located in the Town of Southeast, this retrofit project included outfall stabilization. This project was completed by the municipality and funded by County. This project has been approved for final credit by the NYSDEC.

**SE-PRE-07 (Starlea Road – Year 1)** – Located in the Town of Southeast, this retrofit project included outfall stabilization and installation of deep sump catch basins. This project was completed by the municipality and funded by County. This project has been approved for final credit by the NYSDEC.

## EAST OF HUDSON WATERSHED CORPORATION

**SE-PRE-08 (Ives Farm – Year 1)** – Located in the Town of Southeast, this retrofit project included outfall stabilization. This project was completed by the municipality and funded by County. This project has been approved for final credit by the NYSDEC.

**SE-PRE-09 (Panorama Road – Year 1)** – Located in the Town of Southeast, this retrofit project included outfall stabilization. This project was completed by the municipality and funded by County. This project has been approved for final credit by the NYSDEC.

**SE-PRE-10 (Carlson Lake – Year 1)** – Located in the Town of Southeast, this retrofit project included outfall stabilization and installation of deep sump catch basins. This project was completed by the municipality and funded by County. This project has been approved for final credit by the NYSDEC.

**SE-PRE-11 (Shore Drive – Year 1)** – Located in the Town of Southeast, this retrofit project included outfall stabilization and installation of a hydrodynamic separator. This project was completed by the municipality and funded by County. This project has been approved for final credit by the NYSDEC.

**Southeast-EB-05 (Rockledge Drive – Year 2)** – Located in the Town of Southeast, this retrofit was originally part of the Year 2 plan and includes outfall stabilization. This project was completed by the municipality and funded in part by the County. This project has been approved for final credit by the NYSDEC.

**Southeast-PA-05 (Brewster Hill – Year 2)** – Located in the Town of Southeast, this retrofit was originally part of the Year 2 plan and includes outfall channel stabilization on Town property. Construction was completed in 2013.

**Southeast-PA-06B (Seven Oaks Lane – Year 2)** – Located in the Town of Southeast, this retrofit project replaced Southeast-PA-24 and included installation of a new detention pond. This project was completed by the municipality and funded by the County.

**Southeast-PA-21 (Suburban Propane – Year 4)** – Located in the Town of Southeast, the proposed SRP is for installation of a deep sump catch basin. This is not an approved NYSDEC practice for phosphorus reduction and therefore the project has been cancelled.

**Southeast-PA-23 (CV Star Intermediate School – Year 3)** – Located in the Town of Southeast, the retrofit includes the installation of a new Micropool Extended Detention Pond. Construction of this retrofit was completed in 2013 and approved for final credit by the NYSDEC.

## EAST OF HUDSON WATERSHED CORPORATION

**VB-DI-31 (Brewster-Tonetta Brook – Year 3)** – Located in the Village of Brewster and Town of Southeast, this retrofit project includes rehabilitation of an existing stormwater collection and conveyance system and installation of a new Wet Extended Detention Pond. Construction of this project was completed in 2014 and approved for final credit by the NYSDEC.

**VB-DI-32 (Brewster-Wells Brook – Year 3)** – Located in the Village of Brewster and Town of Southeast, this retrofit project includes the installation of a new Wet Extended Detention Pond to treat runoff collected in an existing collection and conveyance system prior to discharging to Wells Brook. Construction of this project was completed in 2014 and approved for final credit by the NYSDEC.

**VPW-3 (Year 2)** – Located in the Village of Pawling, this retrofit project included channel stabilization. This project was completed by the municipality, funded by Dutchess County, and approved for final credit by the NYSDEC.

**VPW-4 (Year 2)** – Located in the Village of Pawling, this retrofit project included channel stabilization. This project was completed by the municipality, funded by Dutchess County, and approved for final credit by the NYSDEC.

**Y-MU-10 (Railroad Park – Year 3)** – Located in the Town of Yorktown, the original retrofit was for the installation of dry swales. The proposed practice was revised to a Pocket Pond. Detailed design of the revised retrofit is complete and easements must be obtained from NYSDOT and Westchester County DOT before construction can begin.

**Y-MU-11D (Junior Lake Driveway – Year 1)** – Located in the Town of Yorktown, this retrofit project included the permeable pavers at the Junior Lake access driveway. This project was completed by the municipality and funded by Westchester County.

**Y-MU-14 (Police Station and Court – Year 3)** – Located in the Town of Yorktown, this retrofit includes the installation of a Wet Extended Detention Pond at the Yorktown Police Station. Detailed design of the retrofit is complete construction is expected to start in 2015.

**Y-MU-15 (Junior Lake Driveway – Year 2)** – Located in the Town of Yorktown, this retrofit project included the excavation of an existing Stormwater pond to increase storage at Yorktown High School. This project was completed by the municipality and funded by County.

**Y-MU-17A (Sparkle Lake – Year 3)** – Located in the Town of Yorktown, this retrofit includes the installation of an infiltration practice as well as outfall stabilization on Town property. Construction of this retrofit was completed in 2013 and approved for final credit by the NYSDEC.

## EAST OF HUDSON WATERSHED CORPORATION

**Y-MU-17B (Sparkle Lake – Year 3)** – Located in the Town of Yorktown, this retrofit originally included the installation of a Hydrodynamic Separator on Town property. The project has been modified to a Stormfilter System for greater pollutant removal efficiency. Construction of this retrofit was completed in 2013 and approved for final credit by the NYSDEC.

**Y-MU-40 (Hallcocks Mill – Year 5)** – Originally part of the Year 4 Plan postponed to Year 5, this SRP is located in the Town of Southeast and includes construction of a new wet pond. This project is currently in conceptual phase with detailed design and construction expected to be completed between 2015 and 2016.

**Y-MU-41 (Highway Garage – Year 4)** – Located in the Town of Yorktown, the proposed SRP is a Stormfilter system. The project has been cancelled due to site constraints.

**Y-MU-42 (YCCC – Year 4)** – Located in the Town of Yorktown, the proposed SRP is a Stormfilter system. The project has been cancelled due to site constraints.

**Y-MU-43 (Heights – Year 4)** – Located in the Town of Yorktown, the proposed SRP is a Stormfilter system. The project has been cancelled due to site constraints.

**Y-MU-44 (Depot Plaza North – Year 4)** – Located in the Town of Yorktown, the proposed SRP is a Stormfilter system. The project has been cancelled due to site constraints.

**Y-MU-45 (Lexington Avenue – Year 4)** – Located in the Town of Yorktown, the proposed SRP is a wet extended detention pond to be constructed on private property. This project has been cancelled due to its location.
