Hi Rich,

PV does not possess any districts or areas within the watershed that would need a waste water solution. We do have the hamlet of Lake Peekskill but that is outside the EOH. We have done 3 studies on this District and the last one brought an estimate of 41 million dollars to establish a sewer district within that area which would hook up to the Cortlandt Manor system (if they would even be willing to allow us to do so). Bottom line is that the residents of LP would have to pay this bill at a yearly cost (if we could get a 30 year bond) of about 3,500 a year. That does not include each home's connection to the main sewer line. Not tenable at all as LP has some of our more economically challenged families. So I believe that those areas within the EOH should have priority over an area like LP in using the allotted funds. What our Town has decided to do is to support (as best we can) individual septic replacements using the new technology of minimized fields and decomposition of waste via septic tank filtration and bi-yearly pumping. Still tough to do, but we will be using some of the COVID money to support these measures.

Thank you Rich!

Sam
